PubMed Power Tools

Use **MeSH (Medical Subject Headings)** to translate medical terminology into language that permits searching with specificity.

Limits refine your search and reduce the size of your result set.

Use **History** to access searches conducted within the same day or to formulate "building blocks" for your searches.

The **Clipboard** allows relevant articles to be saved while performing other searches.

The **Abstract Display Mode** provides links to the full text (when available) and to **related articles**.

Use the **Single Citation Matcher** to locate a specific article quickly.
