## **NURSINGCONSULT IS HERE!**

NursingConsult is an online service to help nurses find answers to clinical questions efficiently. It covers drug information, patient education, journals, reference books, current news, clinical practice, and evidence-based content. You will find this resource in the database menu on the Library's homepage.

## **VISIT OUR NURSING PORTAL**

Are you frustrated by time consuming searches for materials specifically targeted to nurses? Quick access to nursing resources can be found on the nursing portal in the subject portals list of the Library's website. You will discover links to information on evidence-based practice and nursing care plans. You will also find a list of the Library's nursing journals, selected books, and databases. Let the nursing portal be your first stop for nursing information resources!

## **DID YOU KNOW?**

- Library staff can visit your department for personalized instruction on Library resources. Contact the Library liaison for Nursing, David Duggar, at 55472.
- If you need help finding information for your patients, [www.healthlinks.org](http://www.healthlinks.org), the Library's consumer health information site, can help!
- Patient education handouts can be found in the NursingConsult, MDConsult, UpToDate, and AccessMedicine databases.
- You can access our resources from home. Click on "Off-Campus Access" on the Library's homepage.
