HOOVER WATERCOLOR SHOW

"Lily Pads" by Jeanne Reed

You are invited to attend the Hoover Watercolor Society's annual Juried Small Painting Show reception in the Library on Sunday, September 28, from 2:00 to 4:00 p.m. The public is invited to this event, and valet parking will be available. The artwork will continue to be on display in the Library until November 3.

The Hoover Watercolor Society is a private, non-profit organization founded in 1958 as the Shreveport Watercolor Society. The Society's goals are to provide members with opportunities to exhibit their artwork in judged exhibitions and to educate the public in fine watercolor art.

For information on visiting the exhibits on weekends, call the Library at 675-5445.

CINAHL ACCESS

CINAHL, the Cumulative Index to Nursing and Allied Health Literature, is no longer available via Ovid. EbscoHost is now the only provider of the CINAHL database. Although the interface is different, the data is the same. If you need assistance with this resource, please click the “Ask a Librarian” icon on our webpage or phone 675-5477.

ACCESSING RESOURCES FROM HOME

While it is still possible to access library resources from your proxy server account, the VPN is now the preferred form of access. Software to download the VPN is available by clicking <http://vpn.lsuhs-c-s.edu>. You will need your LSUMC-MASTER username and password (the same one used for your email) to use this software. The VPN and the proxy server both permit off-campus access to many resources licensed by the library, such as online journals, books, and databases. However, the VPN software also provides access to some of the clinical applications, while the Library's proxy server does not.

DID YOU KNOW??

Budget records of the Shreveport Charity Hospital (a forerunner of the current LSU Hospital) from 1889 reveal some very interesting facts and figures. The salary of the chief surgeon was \$75 a month and the hospital superintendent, a non-physician, was paid \$25. Milk served to the patients was purchased at 15 cents a gallon, while meat was a mere 5 cents a pound. Ten years later, in 1899, a trained nurse was employed for the first time with a monthly salary of \$30. When she requested a raise to \$50 a month, she was replaced with another nurse who was willing to work for \$40 a month. These and other interesting facts about our history can be found in documents held in the LSUHSC-S Medical Library Archives.
